Function Description

UBEM is seeking for a Superintendent based in Antwerp.

He will be responsible to follow up a number of vessels under the supervision of the Technical Manager.

He will keep the vessels technically fully operational in accordance with the ISM code.

He is the person ashore directly involved on a daily basis, with all other aspects of the vessels and will keep UBEM fully informed.

He will visit his vessels regularly and during these visits, the Master and the Chief Engineer will be directly responsible to the Superintendent.

Preferred profile

Formal education:

Master Degree Industrial Engineering.

Marine training will be provided by us.

Or

Bachelor Degree in Marine Engineering.

Additional certificates or experiences:

Holder of STCW Chief Engineer 3000 KW or more.

Some years of sea going experience as a Chief Engineer or Second Engineer.

Eventually some years of experience as a Marine Superintendent.

Fluent English spoken and written.

Prepared to travel abroad on short notice.

Specific responsibilities

- Carrying out ship's visits as described in the Company's SMS booklets.
- To prepare and ensure that crew personnel carries out the relevant planned maintenance schedules in accordance with the policy agreed with the Technical Manager.
- To monitor vessel's Class and trading certificates to ensure timely renewal and / or survey.
- Drawing up and follow up vessel's budget.
- Making up purchase orders and follow up supplies and related costs.
- Preparing, supervising and finalizing dry dockings.
- Following up vessel's reporting forms with appropriate feedback.
- Following up vessel's maintenance program to make sure it is fully updated on a daily basis by the vessel's staff and reflects the true condition of the vessel.
- To assist in dealing with marine insurance claims.
- To keep abreast of technical developments and make suggestions regarding their application.
- Standing by in case of emergency procedures.

Offer

This is a permanent position offering a competitive salary and benefits package.
Challenging responsibilities in a complex, challenging and international environment.
